GROUP 260

REQUEST FOR RECONSIDERATION  
OF DECISION REFUSING TO WITHDRAW AN OFFICE  
ACTION THAT PREEMPTED A PRELIMINARY AMENDMENT

Hon. Assistant Commissioner  
For Patents  
Washington, D.C. 20231

Sir:

Favorable consideration of this Request for Reconsideration is desired in view of the comments which follow.

Group Director Godici argues that Applicant misstated the content of the meeting held with Applicant on October 24, 1995. Since the content of that meeting was not recorded or transcribed, it is apparent that there was some misunderstanding as to the interpretation of some of the comments made at that meeting.

Nonetheless, it is believed clear from the discussions which took place at that meeting that several of the applications listed in Appendix I contained claims which, although they had been preliminarily amended, needed to be further amended to present more focused claims. Director Godici acknowledged as much. The meeting of October 24, 1995 focused, in part, on the applications which are the subject of this Request for Reconsideration. The decision made by the Office to act upon these applications without notice to the Applicant is, by any reasonable standard, arbitrary and capricious and cannot serve to promote any kind of positive image for the Patent and Trademark Office.

It is appropriate to point out here that Director Godici recommended at the meeting referred to above that Applicant work with Supervisory Examiner Richard Hjerpe, SPE of art unit 2609 to provide updating and status information relevant to the several different applications pending in Group 2600 and elsewhere. Accordingly, updates were provided to Mr. Hjerpe. The communications between Mr. Hjerpe and Applicant included updating information such that it was known which applications had focused amendments and those which did not have such amendments. Examiner Hjerpe and Applicant agreed that focused amendments would be hand-delivered to the Group and applications containing the focused amendments would be acted upon. It was recognized that no useful purpose would be served by acting upon the applications which did not have focused amendments. Therefore, Applicant began to file the agreed upon focused amendments as indicated in the original petition. To say the least, Applicant was taken aback when Office actions were issued in the applications which are the subject of this Request for Reconsideration. Attached hereto as Appendix II is a fax communication

from Mr. Hjerpe dated December 14, 1995 listing the cases in his art unit to be acted upon. Appendices III, IV, and V are copies of telecopier listings from Applicant to Mr. Hjerpe listing applications having amendments which place the applications in better condition for examination. Appendix VI is a list of applications as requested by Mr. Hjerpe. This flow of information between Applicant and Mr. Hjerpe is a development extending from the meeting of October 24, 1995 and reflects a desire and intention to work harmoniously together to effectively prosecute the Applicant's applications.

It is believed that one of the aims of the Customer Focus Policy of the Commissioner is to be of assistance to the public and to ensure fair and consistent treatment of all who are users of the system. The decision denying Applicant's petition stated that Applicant had no reason to expect an opportunity to file focused amendments. Even though there may have been some misunderstanding as to some of the comments made at the meeting with Director Godici, it is clear that Applicant and Mr. Hjerpe were of one accord insofar as making focused amendments available before action was taken. But for the guidance offered at the meetings with Director Godici and Mr. Hjerpe, Applicant would not have generated the original petition. All that is requested is a fair chance to have focused claims considered in each of the applications. What Applicant has met with, however, are Office Actions directed to unfocused claims which were generated without any informational communication to or with Applicant. This was done despite the fact that it was known that Applicant was continuing to generate focused amendments in many of the applications including those which are the subject of this Request for Reconsideration.

Second, since no error was made by the examiner in issuing the Office action of November 1995, and since petitioner waited until April 17, 1996 some five months after that action; to first petition for the withdrawal of that action, the final rejection June 27, 1996 is proper and will not be withdrawn. Petitioner filed a responsive amendment to the action of November 22, 1996 on April 29, 1996. The examiner promptly issued the final rejection. Petitioner has presented no reason to withdraw that action other than his request to withdraw the previous action.

Finally, petitioner request a refund of the two month extension of time fees filed with the response of April 29, 1996 since he states that the fees were paid to maintain pendency while "this matter was being resolved." The "matter" was not brought to the attention of the Office until April 17, 1996, approximately five months after the action was issued. The delay was solely applicant's. Applicant is required to bring to the attention of the Office an alleged error within 2 months of that action (37 CFR 1.181). He did not and therefore the need to file the extension was the fault of the applicant's and the fees will not be refunded.

In the future any request for supervisory review under 37 CFR 1.181 will not be considered unless filed within 2 months of action complained of.

Summary: DENIED

Nicholas P. Godici  
Director, Group 2600  
Communications, Measuring, Testing and Lamp  
Discharge Group

Mr. Gilbert P. Hyatt  
P.O. Box 81230  
Las Vegas, NV 89180

A telephone call or other communication would have at least put Applicant on notice that examination would take place within some fixed period of time. No such notice or communication was afforded despite Applicant having traveled from Las Vegas, Nevada and having met with Director Godici regarding this (these) application(s) and other matters, as well as having met, at Director Godici's request, with Mr. Hjerpe.

Since it was known that amendments were being filed with focused claims, it would have been appropriate, by any standard, to notify Applicant that the applications were about to be acted upon. As explained in the original petition, Applicant filed 49 related applications including the 30 under consideration in this petition. Eighteen of those 49 had focused preliminary amendments filed and the remaining 31, including the 30 which are the subject of this petition, did not have focused amendments filed. Office actions were generated in the 30 applications which do not have focused amendments but as of the date of this Request for Reconsideration, some 12 of the 18 applications wherein focused preliminary amendments were filed, have not been acted upon. Again, this action is believed to be quite arbitrary and capricious.

✓ Applicant is asking for nothing more than any other patent applicant expects who files patent applications and expends significant filing fees. That is, a chance to have a ✓ complete examination of his applications containing claims to the invention. Here, the PTO was aware of the 30 applications referred to in this Request and their similarity as well as Applicant's intention to submit more focused claims by way of preliminary amendments. Despite this knowledge, it appears that all of the applications were gathered together and one Office Action prepared and printed out 29 times with very

minor differences. This is not, in Applicant's view, Customer Focus. Applicant discussed customer focus in quite some detail in Appendix IV, sections 2.2 and 2.3 of the original petition. Applicant calls attention to attached Appendix VII which reflects that Group 2300 not only notified Applicant of the applications pending in the Group but also, in a telephone communication on even date with the fax notification, indicated when the applications would be acted upon, and the time period when amendments could be filed. It is not unreasonable to expect similar treatment, particularly where the inconsistent actions come from Groups within the same electrical cluster.

#### **RELIEF REQUESTED**

The relief requested is as indicated in the original petition. That is, to withdraw each of the Office actions which preempted preliminary amendments in the 30 applications listed in Appendix I of the original petition and similarly in attached Appendix I and afford Applicant the opportunity to file focused amendments in the identified applications at a rate to be set by Director Godici or his designee.

Applicant also requests withdrawal of the final rejection which has issued subsequent to the original petition in 29 of the 30 applications which are the subject of this Request (the sole exception being Serial No. 08/465,173). Since this most recent rejection was mailed subsequent to the original petition, the request to withdraw its finality could not have been earlier presented. Accordingly, withdrawal of both the First Office Action and the Final Rejection are requested in this Request for Reconsideration.

Finally, Applicant requests a refund of all of the extension of time fees which have been paid to maintain pendency of all of the above identified applications while this matter is being resolved. The basis for this request is quite straight forward. It was error on the part of the Office, to issue the Office actions in the manner described above. This mistake on the part of the Office caused or prompted the action of maintaining the applications in a pending status (including the filing of a response) while the matter of deciding the issues in the petition were being pursued. Thus, Applicant expended \$190 in excess for a two month extension of time in each of the applications listed in Appendix I. Accordingly, a refund of the extension fee is requested in and for each of the applications. The refund should be credited to Deposit Account No. 08-3626.

For purposes of completing the record, the original petition with its attachments is incorporated herein by reference.

CERTIFICATION OF TRANSMISSION: I hereby certify that this correspondence is being facsimile transmitted to the Patent and Trademark Office (Fax No. (703) <sup>305-3991</sup> ~~305-3401~~) on August 15, 1996. *UPH*

Respectfully submitted,

**TELEPHONE SUMMARY OF COMMUNICATION WITH SPE THOMAS LEE**

**SPE Thomas Lee telephoned the Applicant on November 17, 1995. SPE Lee said that he had spoken with the Director of Group 230, Bobby Gray, and that they had decided the following. There were 40 applications that the Applicant had filed on June 6, 1995 that were in Group 230. These applications would be examined in the near future. The Applicant would be given a minimum of two weeks from November 11, 1995 to file preliminary amendments in these applications. The Applicant was requested to have his Washington associate hand deliver the preliminary amendments to circumvent delays through the PTO mail room.**

**The Applicant told SPE Lee that he intended to take advantage of this opportunity to file preliminary amendments in most of these 40 applications.**

**SPE Lee said that about half of the 40 applications had a preliminary amendment in the file wrapper. The Applicant told SPE Lee that first preliminary amendments had been filed in all of the 40 applications.**
